Downloading the Flash Player and Dolphin browser as detailed above should also enable the You - Tube downloader to function properly. Instead of being slave as to what television corporations decide to broadcast that day, you decide on which show you want, watch it whenever of day, and so on a quantity of devices. It's a simple 18 megabyte download that installs a local copy in the Netflix software, you'll be able to start watching your movies. This small device can connect for your home network, either having a wired or wireless connection. When the download is complete it is possible to check that it is working by visiting You - Tube or Catch up TV using the Dolphin browser.
